

# GALAXIANS

by Martin Sevier

*Arcade Game for the Exidy Sorcerer*  
— WITH COMPREHENSIVE SOUND EFFECTS —

## *Can you survive a Galaxian Attack?*

Galaxians comes to you either on cassette or diskette. The cassette version is recorded twice at 1200 baud on the front side of the cassette and once at 300 baud on the reverse. Use the monitor command: LOG to load the 1200 baud version and the two monitor commands: SE T=1  
LOG

to load the 300 baud copy if necessary. The diskette version will boot, but it may be necessary to type GALAXIANS to run the programme.

To obtain sound, connect any output pin from the PARALLEL INTERFACE to ground. We recommend our 'Soundplug' for this purpose.

## **SYSTEM SOFTWARE**

1 KENT STREET, BICTON  
WESTERN AUSTRALIA 6157  
TELEPHONE: ISD (619) STD (09) 339 3842  
Sunday through to Friday.  
Ask for Richard Swannell for personal service.

*We are a dynamic Western Australian enterprise whose sole aim is to bring you the best in Sorcerer software. Catalogues are produced regularly and sent to approximately 2000 interested Sorcerer users in all parts of the world. Let us know if you wish to be included on our mailing list.*
